

## The Information Security Specialists

ipsec 

## The IPsec information shield - safeguarding business success.

IPsec are specialists in information asset security; technology experts who know how to mitigate risk to business by implementing end-to-end solutions that protect invaluable intelligence, data and information.

From assessing vulnerabilities and threats, to designing and implementing customised security strategies, to managing execution and optimising results, IPsec are guardians of business confidence. Through high level protection, they provide optimal assurance of an organisation's security posture.

## Security innovation. Risk elimination.

Information security has never been more critical. No longer an optional business expense, it is now a legal and ethical requirement that makes good commercial sense. The information stored by every business is a valuable asset that needs protection from both internal and external hazards. Businesses that understand this trust IPsec to protect the availability, privacy and integrity of their information systems.

IPsec is about mitigating risk; enabling confidence and agility by ensuring a reliable IT environment that allows business to get on with business.

As specialists, IPsec aim to deliver total protection - from idea to implementation - by tailoring security solutions and services that adapt as businesses change and grow. Providing insightful advice that is both pragmatic and appropriate to each organisation allows IPsec to keep the overall cost and complexity of the solution to a minimum, whilst maximising value and impact.

## Information security requires specialist advice. Look no further.

The IPsec team deliver better security advice because we intrinsically understand it; we work objectively and independently, using best-practice methodology across the entire life cycle of information security. IPsec are problem solvers at the highest level, a formidable team with unrivalled expertise and experience.

The IPsec team is made up of career information security specialists, all of whom are certified engineers with an extensive appreciation of both the global IT security landscape, and the security needs of Australian organisations.

## Proven solutions. Fixed prices. Peace of mind.

The deployment of information security solutions must be managed intelligently to ensure they are appropriate, comprehensive and adaptable. IPsec have an exemplary track record in providing the following information security services:

- **Assess:** Identify risks to information assets;
- **Design:** Develop appropriate mitigation strategies to address those risks;
- **Implement:** Put into effect solutions and technologies appropriate to the unique needs of each client;
- **Maintain:** Provide ongoing management, monitoring and maintenance services to ensure information security technologies continue to run at their optimum security level.

Whether it is facilitating a flexible, mobile workforce, initialising best-practice gateway and Internet access, or dealing with a malicious hacker, IPsec are protecting and supporting the information assets of Australian businesses. 24 hours a day, 365 days a year.

## Tackling security with fierce practicality.

IPsec are Tier 1 partners with multiple vendors holding the highest level of engineering certifications. We remain independent and product neutral – using the best product for the particular problem at hand.

IPsec are focused entirely on client outcomes. That means clients can be focused on getting on with their business, confidently and securely.

### 1. Security Policy Framework

The IPsec Security Policy Framework (SPF) provides a strategic foundation for the protection of assets, systems, processes, people and the reputation of the organisation.

This unique, productised approach provides high value security outcomes in a vastly condensed time frame for a fraction of the cost of our competitors. Usable on day one, it is a sustainable, manageable, scalable and effective protection policy that allows businesses to rapidly achieve policy compliance with Australian Standards for information security management.

### 2. Strategic Security Consulting

IPsec's Professional Security Services (PSS) represent a complete suite of IT security engineering and IT security consulting services. IPsec's modular approach to PSS enables a quick and precise response to any security problem in a highly cost predictable and scalable manner.

IPsec can assist in reviewing existing security postures, the deployment of security solutions, or assessment of the best path to an improved security outcome.

### 3. Maintenance & Support

IPsec can provide a localised, central point of contact for all information security support needs. The value of a single security support partner makes good business sense:

- IPsec understands all aspects of the security infrastructure and the interrelationships between your environment & security solutions;
- Access the right knowledge, yielding faster diagnosis of issues, and minimising uncertainty over where an issue is specifically originating;
- Being supported by an end-to-end security specialist provides access to strategic discussions around broader technical security issues transcending focus on just one supported product;
- Access to IPsec's dedicated maintenance renewals team.

### 4. Managed Security Services

The success of Australian businesses today is significantly underpinned by utilising IT as a material vehicle for commerce. Ensuring the integrity, and availability of an organisation's information systems is a business critical issue.

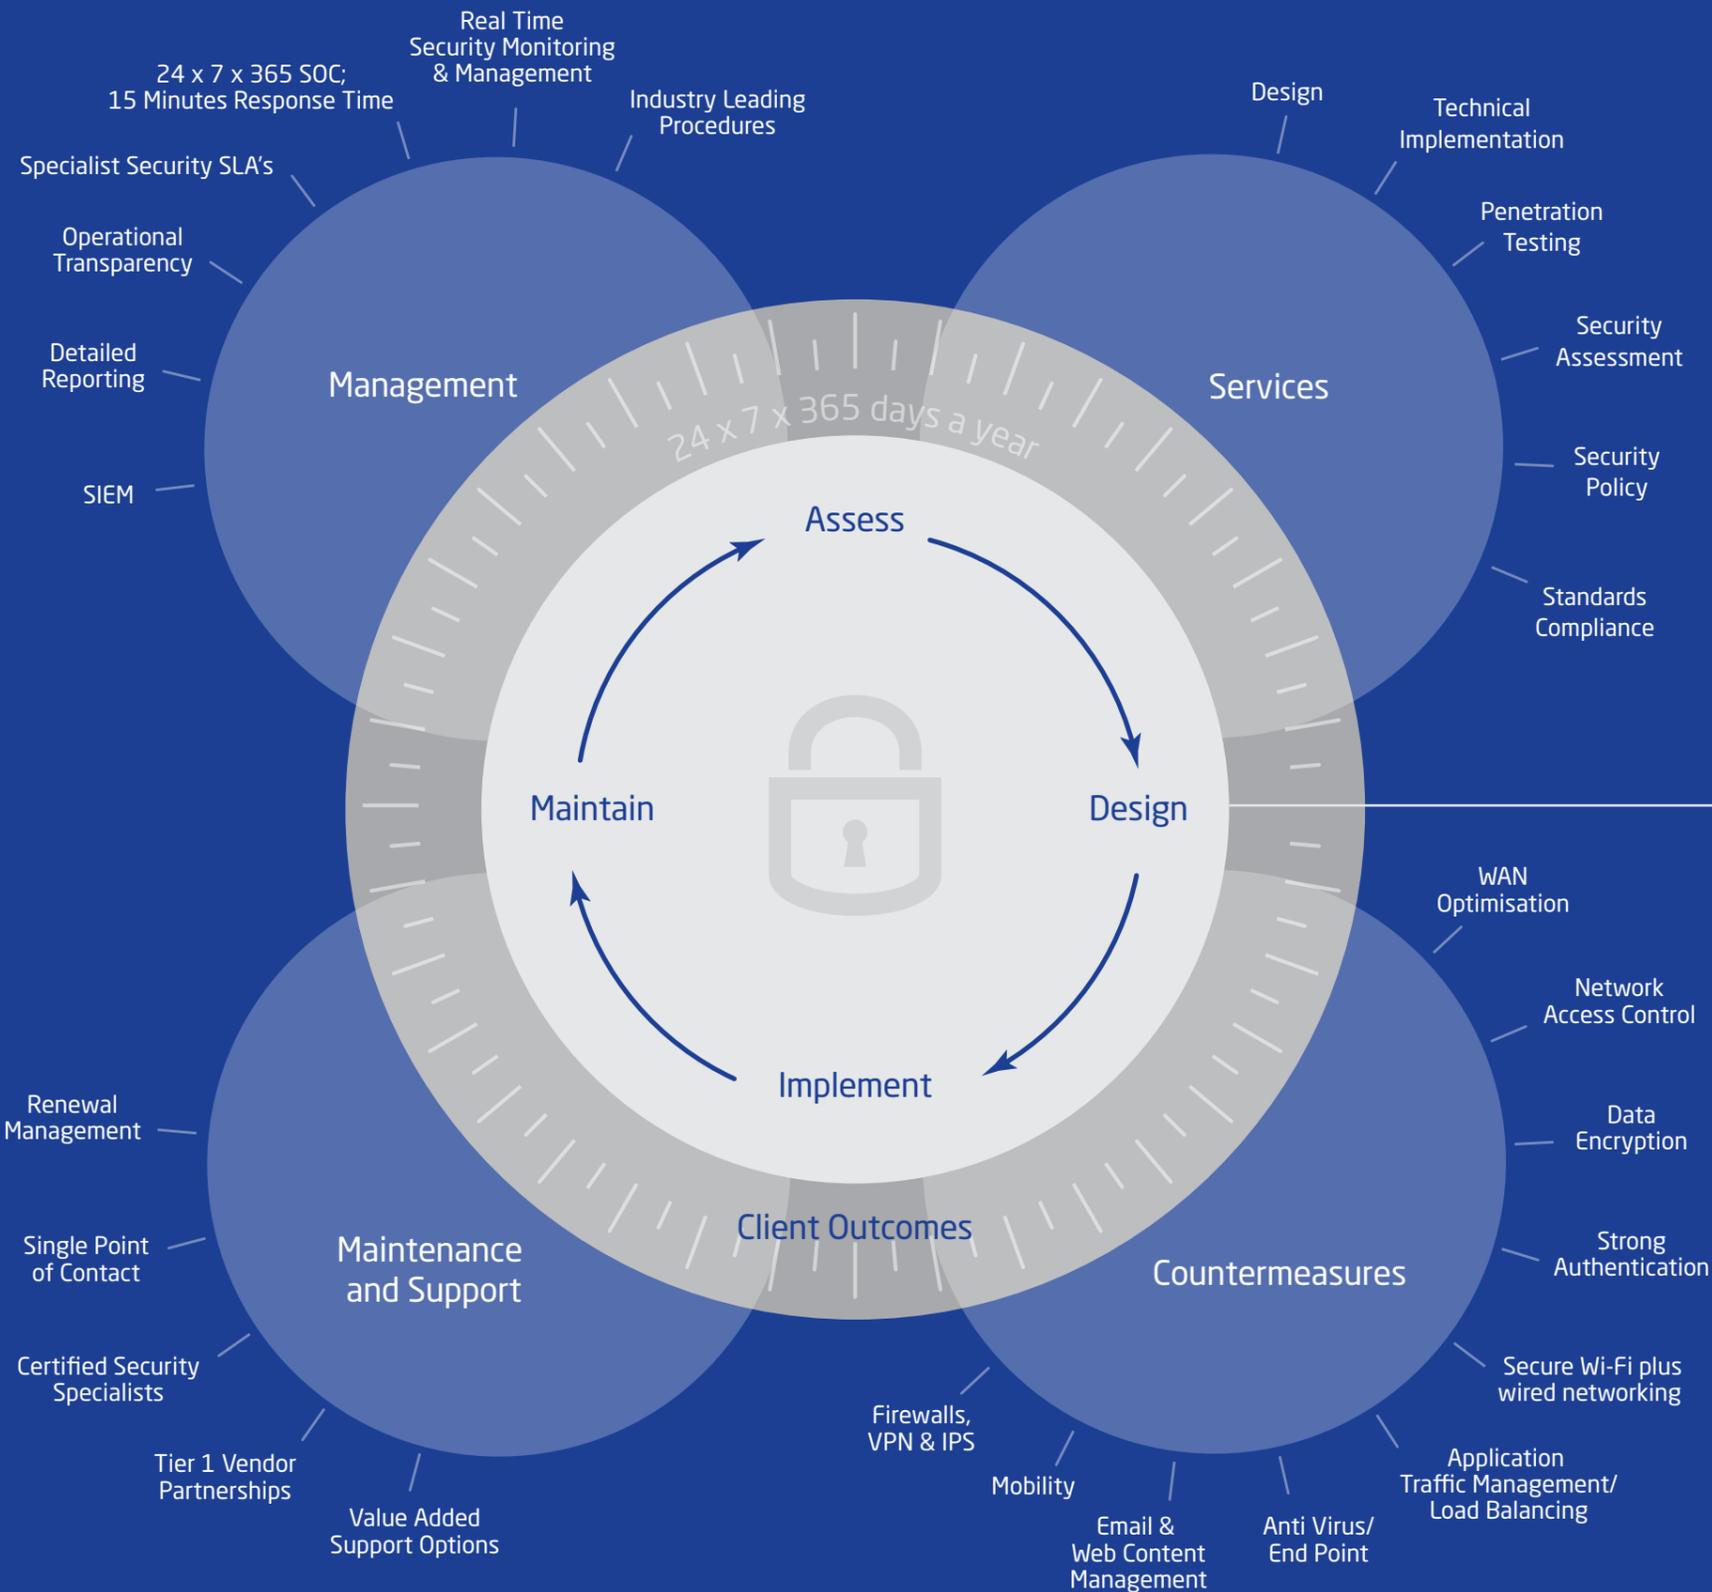

Maintaining effective in-house information security management systems is a costly and resource-heavy exercise. Effective security outcomes require a number of key elements including:

- Situational awareness;
- Monitoring & management;
- Emergency response;
- Skilled security professionals;
- Robust security procedures.

The IPsec managed security service delivers the highest quality security management outcomes within an achievable operational expense. Your IT resources are released from the burden of security management tasks, freeing up their time to focus on what is most important in day to day systems delivery. With IPsec managing your Security Services, you will have at your disposal:

- 24 x 7 x 365 security monitoring and management;
- Next generation security operations centre;
- Comprehensive and Flexible SLA's;
- AS/NZS27001 aligned practices;
- SLA assurances;
- 24 x 7 x 365 access to the IPsec Customer Portal;
- Comprehensive reporting;
- 24 x 7 x 365 access to security expertise;
- Emergency response;
- SIEM integration.
